

RITRANSPARENCY REPORT 2020

Nykredit Realkredit Group

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

been signatories to the UNPRI since 2009. Both companies have very similar approaches to responsible investments, but still had at the end of the year separate policies. As this UNPRI report represents the activities of Nykredit during the entire 2019 guided by its policies, this report treatsNykredit as a separate entity. For the reporting year of 2019 the Nykredit report will only cover investments and activities under the Nykredit-group as it was prior to the acquisition of Sparinvest. The same principle is used for the Sparinvest reporting. For the next report covering activities in 2020 the Nykredit report will cover investments and activities in both companies.

General 31/12/2019 Indicate your total AUM at the end of your reporting year. Total AUM 334,490,584,373 DKK 49350657150 USD Indicate the total AUM of subsidiaries you have excluded from your report (as named in 00 03.2 under "No"). Provide this figure based on the end of your reporting year Total excluded subsidiaries AUM 103,445,941,120 DKK 15262388277 USD Assets under execution and/or advisory only services 33.600.000.000 DKK 4957335595 USD Additional information. [Optional] A third of funds managed are part of our own funds in treasury and the other two thirds is managed on behalf of customers. These are mainly invested in UCITS and FAIF mutal funds General Provide an approximate percentage breakdown of your AUM at the end of your reporting year using the following asset classes and Externally managed (%) Internally managed (%) 4.1 Listed equity 15.7 Fixed income 72.7 2.2 Private equity 0.7 0.5 Property 0 0 Infrastructure 0 1.5 0 0 Commodities 0 Hedge funds 2.6 Fund of hedge funds 0 0 Forestry 0 0 Farmland 0 0 Inclusive finance 0 0

00 11.4	Provide a brief description of how your organisation includes responsible investment considerations in your investment manager

Nykredit demands that all external managed funds are in full compliance with our investment policy.

When Nykredit selects a manager the shortlist of potential candidates are screened as part of the due diligence process. The screening includes due diligence with the managers policy, team, and processes. Nykredit will also do an ESG screen of the existing investments whether or not the manager is signatory to UNPRI is part of the process.

ESG is part of the eventual appointment of the manager. When appointing a manager, Nykredit demands right to exclude investments or be excluded from investments if they conflict with our policy. If the manager is not already a signatory to the UNPRI Nykredit expects that the manager recognize Nykredit as a signatory and expect the investment process of the manager to be in line with the principles.

Nykredit monitors all investments closely. All listed investments are screened on a quarterly basis. The screening is both against norms breaches as well as an ESG-rating of the portfolio and its companies. The results are shared with the managers and forms the basis of the ongoing dialogue with the manager. Once or twice a year Nykredit will meet face to face with the manager and discuss the ESG-performance of the fund as well as the development of new processes.

Nykredit will also share its experiences with our own engagements as well as active ownership with the managers.

			Describe the identified transition and physical cl investment strategies/products.	mate-related risks and opportunities and how they ha	ve been factored into the
			Det overarching policy has the ambition of ensuring our investme	nts are aligned with the goals in the Paris-agreement.	As part of our efforts to
		1	each this goal Nykredit has taken a number of initiatives. Nykredi the Climate Action 100+ initiative since its initiation. Nykredit has	t Asset Management is a supporter of TCFD and has	been an active participant in

 $more\ importantly\ we\ have\ been\ integrating\ ESG-analysis\ into\ the\ active\ investments\ processes\ and\ thereby\ make\ the\ climate-related\ risks\ and\ risks\ and\ risks\ and\ risks\ risks\$

opportunities part of the investment proces

All portfolios are analyzed on an ongoing basis and as part of this Nykredit has identified 16 thermal coal producers and three tarsand companies with extreme transition risk and no strategy to transition. To protect our clinets investments from future loses Nykredit has decided to exclude the companies from all of our portfolios.

Nykredit offers our clients a number of different solutions, which adresses the climate risk and opportunities in different ways. Some products focus on integrating climate-related KPI's into the process and combining this with engagement, whereas others supplement this approach with also excluding companies involved in fossil fuel. The data to asses the climate-related physical risk and so far been quite limited, but they also play a part in the ESG-analysis. This area as well as to continue to look beyond energy sector to identify transition risks is a focus area for the coming year.

Especially in infrastructure these risk play an import role in the risk assessmment and dialogue with our external manager, as these assets are indeed illiquid an the investment horizon is 10 years. Therefore the managers ability to identify and handle these risk are an import part of our selection and monitoring. Nykredit also tries to identify the risks related to each of the investments don in this perspective as well.

The majority of the Nykredit investmens are in securitzed Danish mortgage bonds. These bonds finance the majority of Danish housing as well as farms, ships and buildings of enterprises. As the Danish economy is already far in transitioning to a low carbon economy. This goes for the energy sector, and Denmark is planning to cut emissions by 70% by 2030. Danish authorities have identified the physical risk as mainly risks of draught, flooding and violent weather. The Danish mortgage system lends thorugh large pools financed by bond issuance. This means that the physical risks are spread quite evenly from bond to bond. Better disclosure of the use of proceeds will help make better assessment and this is why Nykredit is deeply engaged in sector developments on better disclosure of lending carbon foot print and use of proceeds. The EU-Taxonomy will also improve this. In general the mortgage bonds has great opportunity is being a tool to finance the investment needs in energyoptimization and renewable solutions. This could both be through traditional mortgage loans and green mortgage bonds, where Nykredit issued its first last year.

O No Indicate whether the organisation has assessed the likelihood and impact of these climate risks? ✓ Yes Describe the associated timescales linked to these risks and opportunities. The base line assumption is that the goals of the Paris-agreement on Climate will be reached. This assumes carbon neutrality by 2055. Nykredit is sees different possible scenarios, including 1.5 degrees and the 3 degrees with the larger physical risk it entails. O No $Indicate\ whether\ the\ organisation\ publicly\ supports\ the\ TCFD?$ ✓ Yes O No Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities. ✓ Yes Nykredit Asset Management supports the TCFD. The investment policy mentions the goals of the Paris-aggreement on Climate. Nykredit has a company wide climate policy and is a reporting member of the Carbon Disclosure Project. O No Indicate the documents and/or communications the organisation uses to publish TCFD disclosures. **☑** Public PRI Climate Transparency Report Annual financial filings ☑ Regular client reporting ☐ Member communications **☑** Other Carbon foot print and actions to handle climate risks are reported in the sustainability reports connected to the annual filings. ☐ We currently do not publish TCFD disclosures PRI 6 Indicate which of your investment policy documents (if any) are publicly available. SG 10.2 Indicate the actions your organisation has taken to promote responsible investment independently of collaborative initiatives.

SG 10.3 Describe any additional actions and initiatives that your organisation has taken part in during the reporting year to promote responsible investment (Ontional)

Nykredit discloses our ambitions and activities to a wide audience. Our yearly reports have space specifically reserved for responsible investment. The specific products also report on procedures and results within responsible investments. Information is also disclosed on our website. Magazines sent to our customers had several articles on responsible investments as well as articles in independent main stream media. RI is part of our continous dialogue with clients - retail as well as institutional. During the reporting year Nykredit partcipated in several events with business organisations and communicates directly with corporations to broaden the understanding and necessity of disclosing ESG-data.

Absolute Following the Paris This is dynamic, so if the Paris Agreement is strengthened, so is the 2050 Files: link Agreement target target Indicate whether climate-related risks are integrated into overall risk management and explain the risk management processes used for identifying, assessing and managing climate-related risks. SG 14.8 CC Processes for climate-related risks are integrated into overall risk management The carbon footprints and ESG portfolio screens are used as part of fund evaluation and policy evaluation together with CIO. The Policy is evaluated in the Forum on Sustainable Investments with representatives of senior management and all relevant departments and is also evaluated in boards of senior management. New analysis and projections are shared actively with the different departments O Processes for climate-related risks are not integrated into overall risk management Indicate whether your organisation, and/or external investment manager or service providers acting on your behalf, undertake active ownership activities to encourage TCFD adoption. SG 14.9 CC ✓ Yes Nykredit is an active member of Climate Action 100+, and find the TCFD adoption as a key engagement tool here. Nykredit also uses TCFD as part of active ownership as such O No, we do not undertake active ownership activities. O No, we do not undertake active ownership activities to encourage TCFD adoption. PRI 1 Mandatory to Report, Voluntary to Disclose Descriptive Indicate if your organisation allocates assets to, or manages, funds based on specific environmental and social themed areas. O Yes ✓ No Descriptive General SG 16.1 Describe how you address ESG issues for internally managed assets for which a specific PRI asset class module has yet to be developed Asset Class Describe what processes are in place and the outputs or outcomes achieved Additional information [Optional] Nykredit is very happy that the modules have been updated. Especially on hedge funds and infrastructure SG 18.1 ✓ Yes SG 18.2 $Ny kredit's four dedicated SRI-funds \ ranging \ from \ global \ equity, investment \ grade \ bonds, high \ yield \ bonds \ and \ a \ sustainability \ equity \ fund.$ The quant fund provides an interesting combination of quant with exclusion approaches. This has histroically proved very competitive compared with traditional funds. Three of these have been developed further to a strict exclusion approach to companies with exposure to fossil fuels and an ESG fundamental inclusion approach with specific focus on green transition. This is combined with active ownership efforts. The sustainable equity fund is certified under the Swan labeled and is the first Danish managed fund to be so. Nykredit's policy on responsible investment in sovereign debt has for more than 8 years combined ESG inclusion and ESG exclusion. A passive global equity fund that tracks an ESG-benchmark but adds further exclusion criteria which in turn improves ESG-ratings as well as An equity allocation fund that allocates between different passive funds that all is in compliance with the Nykredit policy, i.e. exclusions. Working with infrastructure for many years Nykredit has now managed to get acceptance of the UNPRI-principles in many side letters. We know this also used ny other UNPRI-signatories. Nykredit is very happy to be among the founding members of the Ship Recycling Transparency trying to improve responsible shiprecycling Nykredit launched its first green mortgage bond in 2019. O No Indicate whether your organisation typically discloses asset class specific information proactively. Select the frequency of the disclosure to clients/beneficiaries and the public, and provide a URL to the public information. Selection, Appointment and Monitoring

	Asset	Listed Equity							

Scope and process	The EM-manager had very good fundamental approach that in a good way adressed several material ESG-issues, but the approach lacked the overarching strategy and also had room for improvement in company dialogue and in some cases analysis. Nykredit adressed this asking the manager to become a UNPRI-signatory and to improve methodology.
Outcomes	The manager became a signatory a year and a half ago. Since then the policy has been improved and there is much more consistency in the methodology. We have noticed improvements in the portfolios ESG-performance as the fundmanetal analysis, when we go into the details of the specific cases. The very productive dialogue continues.
d Example 3	
Topic or issue	Improving ESG-integration methodology

Topic or issue	Improving ESG-integration methodology		
Conducted by	Internal staff		
Asset class	Listed Equity		
Scope and process	The value-manager has a good fundamental approach, but the approach lacks the overarching strategy and also had room for improvement in company dialogue and in some cases analysis. Nykredit adressed this asking the manager to become a UNPRI-signatory and to improve methodology.		
Outcomes	The manager signed up for UNPRI last year. During the year Nykredit and the manger has had several iterations on methodology and integration of material issues. This improved he mutual understanding of approaches, but the is still work to be done. The efforts have yet to materialize in better ESG-performance.		

☑ Add Example 4

Topic or issue	Improving ESG-integration methodology		
Conducted by Internal staff			
Asset class	Infrastructure		
Scope and process	The infrastructure-manager has very good fundamental approach that in a good way adressed several material ESG-issues, but the approach had room for improvement to compare with the very best in an ESG-perspective. Nykredit adressed this asking the manager to become a UNPRI-signatory and to improve methodology.		
Outcomes	The manager has just become a UNPRI-signatory. Nykredit will continue dialogue on our coomon quest to improve methodology and reporting to clients. Next step will be for the manager to report to the GRESB-framework which will enable us to track improvements and compare to other funds.

☐ We are not able to provide examples

SAM 09.2 Additional information.

Nykredit finds the dialogue with external managers a very positive and fruitfull approach to innovation and improving ESG-approaches. Nykredit would like to thank our managers to be so forthcoming and sharing their insights and ambitions with us. This has not only produced good results but has also meant great learnings for the teams at Nykredit.

Other, specify All funds are screened on a quarterly basis against these criteria Describe how you notify clients and/or beneficiaries when changes are made to your screening criteria. The screening criteria are decided by the Nykredit Forum on Sustainable Investments and, when relevant, the boards of the mutual funds. The criteria are discussed with clients and reviewed internally on an ongoing basis as part of the general yearly review of the policy. Changes are always communicated to clients. Most often changes are made as a result of dialogue with clients. In September, Nykredit excluded a number of fossil fuel companies as a result of the policy goal of investing in line with the Paris Agreement. The decision was communicated through up dates to clients, quarterly reports and is also mentioned in the annual report. Mandatory PRI 1 Indicate which processes your organisation uses to ensure ESG screening is based on robust analysis. Comprehensive ESG research is undertaken or sourced to determine companies' activities and products. 🗹 Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies. 🗹 External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or Third-party ESG ratings are updated regularly to ensure that portfolio holdings comply with fund policies ☑ Trading platforms blocking / restricting flagged securities on the black list. 🗹 A committee, body or similar with representatives independent of the individuals who conduct company research reviews some or all screening ☑ A periodic review of internal research is carried out. Additional information [optional] Service providers assist Nykredit in our engagement process. All decisions whether to engage or exclude are made exclusively by the Nykredit Forum on Sustainable Investments. Any voting decisions are made by PM and ESG-teams. The service providers have a role similar to legal counsel or sell side analysts. The contracts are reviewed and if relevant RFP's conducted every 3 years. Indicate the method of engagement, giving reasons for the interaction. Type of engagement Reason for interaction To influence corporate practice (or identify the need to influence it) on ESG issues ▼ To encourage improved/increased ESG disclosure Individual / Internal staff engagements ☑ To gain an understanding of ESG strategy and/or management ☐ We do not engage via internal staff To influence corporate practice (or identify the need to influence it) on ESG issues ▼ To encourage improved/increased ESG disclosure Collaborative engagements ☑ To gain an understanding of ESG strategy and/or management ☐ We do not engage via collaborative engagements f Z To influence corporate practice (or identify the need to influence it) on ESG issues lacktriangledown To encourage improved/increased ESG disclosure Service provider engagements ☑ To gain an understanding of ESG strategy and/or management ☐ We do not engage via service providers Indicate whether your organisation plays a role in the engagement process that your service provider conducts. ✓ Yes Indicate the role(s) you play in engagements that your service provider conducts on your behalf. ☑ We discuss the topic of the engagement (or ESG issue(s)) of engagement ✓ We discuss the rationale for the engagement We discuss the objectives of the engagement ■ We select the companies to be engaged with ☑ We discuss the frequency/intensity of interactions with companies ☑ We participate directly in certain engagements with our service provider Other specify ☐ We play no role in engagements that our service provider conducts O No Additional information. [Optional] The Nykredit Forum for Sustainable Investements decides whether to initiate an engagement. The goal and milestones are decided together with the service provider. The Forum evaluates each engagement at least once a year. The Forum decides when to end the engagement and if no significant progress have been made to exclude the company.

The internal staff are also involved in the active ownership and at times the active ownership takes a form similar to that of an engagement, but without any breach of norms being identified..

	O None

LEA 09.5 Additional information. [Optional]

☑ Add Example 1

Nykredit aims to play a substantial part in any of our service provider engagements. This means that we decide goals and evaluate them, but it also means that we participate in meetings with the company and, if it is opportune, always meets with the company bilaterally.

The internal engagements noted here are engagements, which only internal staff have been involved in. These types of engagements are not retrospectively trigged by norm breaches, but rather proactively related to risk or action that could be problematic. Engagements related to infrastructure investments were all directed via the manager to the management of the companies and were all related to potential norms breaches that needed clarification and relevant action. Others were triggered by governance issues, som related to voting activities. A handfull were related to clarify and understand fossil fuel involvement and its relevance to the company strategy.

All the service provider engagements are also collaborative in nature, as we engage with other investors, the discussions with these investors also plays an important role in the success of the engagement.

The collaborative engagement is Climate Action 100+ and Ship Recycling Transparency Initiative where Nykredit is a founding and steering group committee member.

Conducted by	Collaborative
	In 2018 a group of sustainability leaders across the shipping supply chain came together and realised something could be done to change the industry narrative, creating a new norm through the simple act of being transparent. They collectively launched the Shi Recycling Transparency Initiative (SRTI) at Tradewinds' Annual Ship Recycling Forum in Hamburg in March 2018 and the SRTI online platform went live in December the same year.
Objectives	The SRTI aims to accelerate a voluntary market driven approach to responsible ship recycling practices through transparency; and subsequently to influence and improve the decision making about ship recycling, creating an industry-wide level playing field.
	Our vision is of a world where ships are recycled responsibly – socially, environmentally and economically – going beyond international conventions and setting a new norm for responsible ship recycling.
	Nykredit is a founding member of the initiative.
	Ship Recycling Transparency Initiative 2020 Report
Scope and	The Ship Recycling Transparency Initiative (SRTI) report is published annually and presents data collected through the SRTI online platform. As the second issue published since the SRTI's launch in 2018, this report aims to provide industry stakeholders with a snapshot on the SRTI's progress, serving as a basis for discussion at the 5 March 2020 SRTI Roundtable at Standard Chartered Bank's offices in London.
Process	The report presents a compilation of data1 on the ship recycling approaches of nine major shipowners that combined operate a total of 2,433 vessels. Describing progress since the last SRTI report, it highlights trends in sustainability and updates on ship recycling regulation. The report also shares the perspectives of shipowners, financiers and shippers on how transparency contributes to raising the bar on responsible ship recycling.
	The data-set is avalaible to all at www.shiprecyclingtransparency.org .
Outcomes	Disclosure / report published

Conducted by	Collaborative
Objectives	Climate Action 100+ tries to support green transition and reduce climate change risks by engaging with the 100 largest emitters. For a more detailed description, see www.climateaction100.org.
Scope and Process	Nykredit is lead together with two different asset owners on two different companies, one in the transport sector an done in the building materials sector. Nykredit is also active in the building materials overarching working group.
Outcomes	Company committed to change

☑ Add Example 3

ESG Topic	✓ Company leadership issues
Conducted by	Individual / Internal
Objectives	Danske Bank handle the issue regarding money laundering, specifically in its Estonian branch and thereby reestablish trust in its responsible business practises among investors, customers and stakeholders. This is paramount to the societies it is active in as well as a prerequisite to future profitability.
	It should share its knowledge about the issue in full, make sure the money laundering is stopped, improve practises and ensure reestablishment of good governance practises in its entire business.
	The engagement is and has been conducted by Danish Equities PM team and ESG team. The process has been dialogue conducted with RI-team, voting and with other investors. The engagement has been vital to the ESG-integration process as well.
Scope and Process	The engagement is ongoing. The company has, however travelled a long way the past year. Disclosing relevant information, cooperating with authorities, inproving process, change of senior management as well as chairman and electing a new chairman at EGM in December. Nykredit has not played the central role, this was done by the two largest shareholders, but supported in any way possible.
	The efforts in 2019 to follow up towards the new management team and support efforts to change. However Nykredit still sees steps to take. One is to find a new candidate for the board in stead of Carol Sergeant, who still serves despite the fact that she was heading the audit committee during the questionable years. This is why Nykredit opposed reelectin
Outcomes	Company changed practice

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

The most advanced ESG-integration approach is used for SSA. This involves using ratings and internally produced evaluation based on input from numerous governmental organisation and NGO's. This is used to determine if the SSA should be excluded, but is also used in dialogue with external manager, who have their own analytical tools to integrate ESG in the investment decision.

For financial and non-financial corporate issuers the ESG-data is mainly used for risk-surveilance and analysis. The research and procedures capture a number of ESG-elements, but Nykredit has yet to launch a systemtic approach to use ESG data as part of the valuation of a specific company. Nykredit is working on a model for this. These corporate bond portfolios all have ESG-ratings above their benchmarks.

The securitised bond are the most challenging in this context. The issuers are screened and rated. As there are only few Danish issuers of these, this is not challenging. The bond rating companies are working on incorporating ESG, and naturally this rating plays a vital role in our process. The credit rating procedures of the individual issuers are also analyzed and used together with the ESG-rating.

FI 01.3 Additional information [Optional].

Securitized bonds in the form of Danish mortgage bonds play an important role for any Danish investor. More than half of our investments are in this type of securitized bonds. The mortgage finance system plays an integral role in financing homes, buildings, enterprises, farm and infrastructure. The mortgage bonds is the primary tool for financing in Denmark, and since they are AAA-rated and have never had a default, they also play an important role for the institutional investor. This goes both for banks and insurance companies as their capital buffers are primarily placed in this type of bonds. Pension funds are also major investors as the bonds are used to balance risk in most Danish investment portfolios. The mortgage bonds has played an integral role in developing the Danish society. The climate friendly houses and high tech industry and farming have been mostly financed by mortgage bonds. Even some wind turbines are financed by mortgage bonds. The strength of the system is the unique combination of linking what has been financed with the bond in a large scale way. The high quality and very low default risk attracts international investors and today more than a third of the bonds are held by international investors. As a result the system offer the probably cheapest financing for private individuals and companies today. This sound like the future of green bonds, but the existing systems has its limitations when it comes to tracking, what has indeed been financed by the bonds.

Nykredit has been engaging with the largest issuers on this issue for years. The many discussions on how finance can play an active role in green transition gave us a unique opportunity to address the issue of better disclosure of the use of proceeds from the bond issuance as well. The discussions were structured as industry wide discussions organized by Finance Denmark. The members of Finance Denmark are both the banks, the issuers of mortgage bonds as well as asset managers and mutual funds. The chairman of Finance Denmark is the CEO of Nykredit, Michael Rasmussen. This unique set up proved very successful, as an advisory committee came up with 20 recommendations. Two of these were committing the industry to do carbon foot printing of not only investments but also their lending activities. This will provide essential data necessary for the future disclosures on mortgage bonds. Nykredit is still engaging with the industry on issuer side and is involved in Finance Denmark committees on sustainable investments and specifically on carbon foot printing.

	FI 02.3 Provide a brief description of the ESG information used, highlighting any differences in sources of information across your ESG
	incorporation strategies.
	The main source of ESG-data is our data provider MSCI ESG-research. Nykredit uses Bloomberg for carbon footprinting. This is supplemented by sell side research and data from NGO's.
	For corporates the approach is quite similar to our approach to listed equities. The data is used for quarterly screens and ESG-risk assessments. And the data is used by the PM's, however not as systematically as on listed equities.
	For SSA the data is sourced from OECD, UN and a number of NGO's to construction in-house custom made screen and rating approach used for the analysis of the SSA. The approach has a high emphasis on political freedoms and democratic procedures.
	The securitized bonds have a number of sources. The issuers are rated, but Nykredit also uses the credit approach. The bond rating agencies play a vital role Nykredit is in dialogue with the two largest issuers to get better data from the underlying loans/proceeds behind the issued bonds.

All data in our IT-system used to prevent any investing in excluded issuers is updated at weekly. The data is at the issuer level to ensure that any new issuance is also targeted. Updated benchmarks are also screened to be at the forefront.

Mandatory Descriptive

FI 10.1 Describe your approach to integrating ESG into traditional financial analysis

Nykredit believes that companies that care about their customers, employees and the rest of society are more profitable. A company that decides to be part of the solution rather than the problem will have reduced their risk and improved opportunities all other things being equal.

PRI 1

When applied to bonds the improved risk assesment is at the forefront, but the future should capture the opportunity part as well.

FI 10.2 Describe how your ESG integration approach is adapted to each of the different types of fixed income you invest in.

SSA

The SSA issuer focussing on improved education, reduction of corruption, or freedom of speech could be a be good opportunity. This is part of the evaluation.

Nykredit's ambitions of sustainable investments also include government bond investments. Our investments are based on compliance with international law. Also, we believe that democracy and human rights may improve returns.

Government bond investments may contribute positively to the development of a country but require vigilant investors. Therefore, Nykredit's guidelines consist of three steps:

Exclusion of countries that are subject to financial transaction sanctions or sanctions against the leaders of specific countries. Inclusion of democracy and human rights in the investment process.

The OECD country risk classification is used for continuous monitoring of investments.

If a portfolio manager or an external manager wants to buy government bonds from a country in the lowest or second-lowest category of the OECD country risk classification (6 or 7), the portfolio manager or external manager must make a sustainability assessment of the investment. Nykredit's Sustainable Investment Forum will then decide, on the basis of the sustainability assessment, whether the investment is in compliance with Nykredit's policy. If not, the country is excluded.

Corporate (financial)

Nykredit believes that sustainability can reduce risk and has the potential to add to returns. The first step is to ensure the compliance with international norms and the guidelines of our clients. In some funds, a breach in international norms will trigger an engagement with the company, and in others it will result in the exclusion of the company. Nykredit is an active owner in dialogue with the companies we invest in. This dialogue is a cornerstone in our efforts to identify ESG risk and opportunities in the investment process. The dialogue is supplemented by third party research as well as ESG-databases. This forms the basis of the Nykredit ESG-position paper provided by the ESG-team, which is used by the investment team to structure active ownership and the materiality of ESG-factors in the investments process. The ESG risk and opportunity are very diverse in nature, but all have a material financial relevance. Examples of these are work place standards, efforts to reduce packing and anti-corruption efforts.

Corporate (non-financial)

Nykredit believes that sustainability can reduce risk and has the potential to add to returns. The first step is to ensure the compliance with international norms and the guidelines of our clients. In some funds, a breach in international norms will trigger an engagement with the company, and in others it will result in the exclusion of the company. Nykredit is an active owner in dialogue with the companies we invest in. This dialogue is a cornerstone in our efforts to identify ESG risk and opportunities in the investment process. The dialogue is supplemented by third party research as well as ESG-databases. This forms the basis of the Nykredit ESG-position paper provided by the ESG-team, which is used by the investment team to structure active ownership and the materiality of ESG-factors in the investments process. The ESG risk and opportunity are very diverse in nature, but all have a material financial relevance. Examples of these are work place standards, efforts to reduce packing and anti-corruption efforts.

Securitise

The issuer of securitised bonds with a very strong credit policy and a loan book a high porportion of ecological farmers and climate friendly housing might have reduced risks compared to traditional analysis.

Securitized bonds in the form of Danish mortgage bonds play an important role for any Danish investor. More than half of our investments are in this type of securitized bonds. The mortgage finance system plays an integral role in financing homes, buildings, enterprises, farm and infrastructure. The mortgage bonds is the primary tool for financing in Denmark, and since they are AAA-rated and have never had a default, they also play an important role for the institutional investor. This goes both for banks and insurance companies as their capital buffers are primarily placed in this type of bonds. Pension funds are also major investors as the bonds are used to balance risk in most Danish investment portfolios. The mortgage bonds has played an integral role in developing the Danish society. The climate friendly houses and high tech industry and farming have been mostly financed by mortgage bonds. Even some wind turbines are financed by mortgage bonds. The strength of the system is the unique combination of linking what has been financed with the bond in a large scale way. The high quality and very low default risk attracts international investors and today more than a third of the bonds are held by international investors. As a result the system offer the probably cheapest financing for private individuals and companies today. This sound like the future of green bonds, but the existing systems has its limitations when it comes to tracking, what has indeed been financed by the bonds.

Nykredit has been engaging with the largest issuers on this issue for years. The many discussions on how finance can play an active role in green transition gave us a unique opportunity to address the issue of better disclosure of the use of proceeds from the bond issuance as well. The discussions were structured as industry wide discussions organized by Finance Denmark. The members of Finance Denmark are both the banks, the issuers of mortgage bonds as well as asset managers and mutual funds. The chairman of Finance Denmark is the CEO of Nykredit, Michael Rasmussen. This unique set up proved very successful, as an advisory committee came up with 20 recommendations. Two of these were committing the industry to do carbon foot printing of not only investments but also their lending activities. This will provide essential data necessary for the future disclosures on mortgage bonds. Nykredit is still engaging with the industry on issuer side and is involved in Finance Denmark committees on sustainable investments and specifically on carbon foot printing.

FI 11.2 Additional information [OPTIONAL]

The KPI's are very different in nature and availability in the four different categories. Our experience is that the available data improves analysis and that viability is improving. Nykredit is especially focussed on the questions related to securitised bonds/mortgage bonds, where the data is mostly related to the issuer and not to proceeds. Nykredit is in dialogue with issuers to discuss future development in light of ratings agencies developments and not least the EU Action Plan on a more Sustainable European Economy.

In Nykredit's investment universe, we strive to make a contribution to the world we all live in. This is true when we invest our customers' money as well as our own. We aim to invest in companies that exercise diligence and care with respect of their customers, staff and society at large. Companies that seize opportunities and want to be a part of the solution, not the problem, are simply just better investments. Nykredit's policy rests on two legs. One leg is to push for a solution when a company violates national legislation, generally accepted UN conventions or Global Compact's principles. We call that active ownership. The other leg is our objective to use knowledge about corporate sustainability performance (environment, social and governance criteria) in the investment process. The Nykredit approach to private equity is the same as with listed equity, but with greater emphasis on using the opportunities in more detailed due diligence and active ownership. The private equity offered to clients is done exclusively via an external manager. The direct private equity in this module is solely unnoted equity invested by the Nykredit treasury as part of strategic partnership with the issuers. The issuers or their owners are all participants in the mortgage cooperation called Totalkredit. Nykredit is a very long term and dedicated owner of this equity. HF 07.3

Additional information [OPTIONAL]

The ESG-information is available on a issuer level. This information is used to better assess any ESG-risks related to the bond performance.

Securitized bonds in the form of Danish mortgage bonds play an important role for any Danish investor. More than half of our investments are in this type of securitized bonds. The mortgage finance system plays an integral role in financing homes, buildings, enterprises, farm and infrastructure. The mortgage bonds is the primary tool for financing in Denmark, and since they are AAA-rated and have never had a default, they also play an important role for the institutional investor. This goes both for banks and insurance companies as their capital buffers are primarily placed in this type of bonds. Pension funds are also major investors as the bonds are used to balance risk in most Danish investment portfolios. The mortgage bonds has played an integral role in developing the Danish society. The climate friendly houses and high tech industry and farming have been mostly financed by mortgage bonds. Even some wind turbines are financed by mortgage bonds. The strength of the system is the unique combination of linking what has been financed with the bond in a large scale way. The high quality and very low default risk attracts international investors and today more than a third of the bonds are held by international investors. As a result the system offer the probably cheapest financing for private individuals and companies today. This sound like the future of green bonds, but the existing systems has its limitations when it comes to tracking, what has indeed been financed by the bonds.

Nykredit has been engaging with the largest issuers on this issue for years. The many discussions on how finance can play an active role in green transition gave us a unique opportunity to address the issue of better disclosure of the use of proceeds from the bond issuance as well. The discussions were structured as industry wide discussions organized by Finance Denmark. The members of Finance Denmark are both the banks, the issuers of mortgage bonds as well as asset managers and mutual funds. The chairman of Finance Denmark is the CEO of Nykredit, Michael Rasmussen. This unique set up proved very successful, as an advisory committee came up with 20 recommendations. Two of these were committing the industry to do carbon foot printing of not only investments but also their lending activities. This will provide essential data necessary for the future disclosures on mortgage bonds. Nykredit is still engaging with the industry on issuer side and is involved in Finance Denmark committees on sustainable investments and specifically on carbon foot printing.

		Assessment	The risk and opportunities related to transition remain low as the exposure to fossil energy is low while exposure to renewable industries are high. The risk related to the risk physical change is low in a global perspective, but risks as flooding on housing, draught effects on farming and violent weather events in general are evident. The assessments by the Danish government agencies are followed closely. The exposure to this is quite evenly spread, but detter disclosure on proceeds will enable a more granular assessment.
